## FABRIC SHELTER PROGRAM

The Fabric Shelter Program has been revamped in order to continue providing members with high quality structures at significant cost savings. Through a competitive bidding process the Trade Division has established a standing offer with Coverco Buildings to streamline the purchasing process and ensure both trade agreement and construction code compliancy. Through this program, AAMDC members will receive an 8 percent- 12 percent discount on the structure along with even more value and cost savings in thorough project management through partnership with Coverco Buildings.

### Shelter Uses:

- Salt and Sand Sheds
- Heavy Equipment Storage
- Cold Storage
- Electronics Recycling
- Recreation Arena/Ice Rink

## WHY COVERCO?

### Superior Engineered Products

- Over 20+ years manufacturing history through Calhoun Super Structures
- Industry exclusive Finite Element Analysis to ensure quality product engineering
- Extensive product line plus entirely custom engineered structures

### Superior Solutions

- Complete turn-key solution that is tailored to maximizing member need and efficiency
- G90 Hot Dipped Galvanized Structure to withstand the most corrosive environments
- Innovative foundation options to meet any need and minimize costs

### Superior Execution

- Dedicated project and process management to oversee costs and timeline in real time
- In-house installation team to ensure project quality and completion
- Extensive quality and safety management program and comprehensive warranty

# Trade DIVISION

## ALREADY HAVE A FABRIC SHELTER IN PLACE?

The primary reason that AAMDC became involved in the supply of fabric shelters to members was due to the history of some structures failing to withstand Alberta's extreme weather conditions. AAMDC and Coverco have developed a Structure Maintenance Program to provide members with preventative measures to mitigate the risk in maintaining these essential structures.
