

MCCAC TAME Express Program Now Available

The **Municipal Climate Change Action Centre** (MCCAC) is pleased to announce the launch of the **TAME Express** program. The program provides quick access to MCCAC funding for energy efficient lighting retrofits and lighting control measures without the need for a full-scale building energy audit. TAME Express offers pre-set rebates for retrofits of indoor lighting, exterior building and parking lot lighting, lighting controls (e.g. motion sensors), and exit signs.

The MCCAC is now accepting applications from municipalities for funding through TAME Express for the completion of high efficiency lighting retrofits. Eligible participants include Alberta municipalities and non-profit community-related organizations who occupy municipally owned buildings or buildings located on municipally owned land.

Visit the **TAME Express** webpage for more details and to apply for your project.

Questions about all MCCAC programs can be directed to contact@mccac.ca.
