

FCM Seeking Municipal Representatives on Asset Management Committee

The **Federation of Canadian Municipalities** (FCM) is seeking representatives to sit on a Technical Working Group for the new **Municipal Asset Management Program** (MAMP). Among these representatives, the FCM is seeking one practitioner representative (municipal staff) from the BC/Alberta region to participate in the committee.

Although working group members should have a working knowledge of asset management, and a familiarity with the strengths and weaknesses of municipal asset management processes in their province, a high level of expertise is not necessary. A major goal of the working group is to increase awareness of asset management and the MAMP for municipalities across Canada, so an interest in asset management and a willingness to promote it to municipal peers is beneficial.

Please submit nominations by email to FCM's Kirsten Brouse (kbrouse@fcm.ca) by **Friday, March 31st**.

Nominations should include the name and title of the nominee along with a few sentences describing the nominee's experience and why they would make a valuable contribution to the Technical Working Group. You are welcome to forward this call for nominations to others in your network.

The first Technical Working Group meeting is tentatively scheduled for May 18th and 19th in Calgary, following the Canadian Network of Asset Managers (CNAM) conference.

For additional information about the Technical Working Group, please review the Terms of Reference, attached.
