RMA, AUMA and IAMA Receive Second Round of MAMP Asset Management Funding

The funding will allow the organizations to build on their recently completed asset management courses

RMA, in collaboration with the Alberta Urban Municipalities Association (AUMA) and Infrastructure Asset Management Alberta (IAMA) have received funding under the Federation of Canadian Municipalities (FCM) **Municipal Asset Management Program** (MAMP) to develop and deliver a second round of asset management capacity-building activities to municipalities in Alberta.

The newly developed activities will build on the workshops delivered to elected officials and municipal staff in the spring of 2018 by selecting a cohort of municipalities to progress collaboratively through the development of an asset management policy, strategy, cross-functional team, and possibly in other areas. Participating municipalities will commit to membership in the cohort for several months, and will make tangible progress on the **MAMP Asset Management Readiness Scale**.

Activity details and invitations for municipalities to submit expressions of interest will be available later in 2018. RMA looks forward to working with AUMA, IAMA and participating municipalities to further improve municipal asset management capacity in Alberta.

This initiative is delivered through the Municipal Asset Management Program, which is delivered by the Federation of Canadian Municipalities and funded by the Government of Canada.
