Check Out Asset Management Resources from Across Canada

The Federation of Canadian Municipalities (FCM) Municipal Asset Management Program has collected a wide range of documents to support asset management uptake

FCM's **Municipal Asset Management Program's** (MAMP) is intended to help Canadian municipalities make informed infrastructure investment decisions based on sound asset management practices. As part of this purpose, FCM has worked with provincial and territorial associations, asset management communities of practice, and other organizations active in asset management to compile a **collection** of asset management resources accessible to municipalities free of charge. The collection includes several categories of resources, such as asset management 101, guidebooks, tools, training materials, and reports. FCM is also working to develop a centralized collection of region-specific tools. To access the resource collection, [click here](#).
