CAPITAL PURCHASING PROGRAM

Rural Municipalities of Alberta (RMA) began working with Sourcewell in 2014 to bring ease to capital purchasing for our members. RMA and Sourcewell, as like-structured organizations, have partnered through a formal arrangement empowering our members to access Sourcewell's group buying program for the purchase of equipment, products, and services. RMA, working through Sourcewell, creates a business and service relationship between buyers through a competitively tendered process done on behalf of our members.

As a member of the RMA, you now have access to contracted solutions from many of the top manufacturers and suppliers in the country. We offer a variety of nationally leveraged products, equipment, and services. Through this program, members can take advantage of the savings of national cooperative contract purchasing. By following competitive tendering requirements, we are able to provide you with valued purchasing solutions that meet your requirements, saving you the time and expense of duplicating the process.

PROGRAM BENEFITS

- ◆ NWPTA/CFTA compliant
- ◆ Transparent and consistent pricing
- ◆ Minimizes administration; our membership does not need to go to tender year after year
- ◆ A paper trail is established between the member and RMA, justifying your group buying decision

HOW TO USE THE PROGRAM

All RMA / Sourcewell contracts are competitively solicited through the RFP process advertised on Alberta Purchasing Connection (APC), resulting in considerable volume discounts. The process to access our contracts is simple. Your first step is to advertise a Notice of Planned Procurement (NPP) on Alberta Purchasing Connection (APC) to use the RMA cooperative purchasing program. The second step is to contact the vendor of your choice directly, informing them of your membership with the RMA and interest in participating in the program. They will do the rest.

PROGRAM LINES AVAILABLE

Agricultural Tractors with Related Equipment & Accessories
