Government of Alberta Electricity Market Review - Provide Your Input!

Government of Alberta launches 90-day review of Alberta's electricity market system

The Government of Alberta has committed to consult with stakeholders on whether Alberta should return to an energy-only market or create a capacity market within 90 days. Below is a short description of both models:

- **Energy-only market** - where power plants are paid only for the energy produced
- **Capacity market** - where generators are paid for having generation available to supply, whether any energy is produced and supplied.

A June 14, 2019 news release from Energy Minister Sonya Savage announced the review. Click [here](#) to read the news release providing information regarding the review process.

If you are interested in participating in the review, the Government of Alberta is interested in hearing:

- Your preferred market design (energy-only or capacity); and
- The rationale for your preference, including impacts on investment, affordability, and reliability.

Please submit your written feedback to electricity@gov.ab.ca by **Friday June 28, 2019**. All submissions must be a maximum of three (3) pages in length.
