Municipal Climate Change Action Centre (MCCAC) becomes a Regional Climate Advisor for Alberta

MCCAC offering free resources and services to help reduce greenhouse gas emissions in municipalities

In July 2019, the **MCCAC** was appointed by the **Federation of Canadian Municipalities** (FCM) to serve as the **Regional Climate Advisor** for Alberta. The MCCAC will support the FCM and the **ICLEI- Local Governments for Sustainability** (ICLEI Canada) **Partners for Climate Protection** (PCP) program by offering Alberta municipalities free resources and consulting services to help reduce greenhouse gas emissions.

The PCP program is free and guides municipalities through a five-step Milestone Framework to help take action on climate change by reducing emissions. Moving through these milestones gives municipalities the opportunity to save money in municipal operations, lower energy costs for residents and businesses, and increase investment in the local economy. The five milestones are:

Milestone 1: Create a Baseline Emissions Inventory and Forecast

Milestone 2: Set Emissions Reduction Targets

Milestone 3: Develop a Local Action Plan

Milestone 4: Implement the Local Action Plan

Milestone 5: Monitor Progress and Report Results

To learn how your municipality can join the PCP program or any other questions about the PCP program, please email contact@mccac.ca.
