## Rural Broadband Portal Online

*University of Alberta portal will allow users to research broadband issues when completing consultations*

The University of Alberta's Centre for Sustainable Rural Communities (ACSRC) developed the **Rural Broadband Portal**. The Rural Broadband Portal is a tool that systematically sorts broadband-related literature and research for unique interventions and policy suggestions. Through the Rural Broadband Portal, the ACSRC aims to assist policy makers, stakeholders, and their communities to make research-driven policy related to broadband development.
