## Municipal Innovation Survey Report Now Available

*MNP released a survey on innovation and local governments across Western Canada*

**MNP** partnered with provincial associations from British Columbia, Alberta, and Saskatchewan to find out what is driving change in Canadian communities and how local governments are adapting. In January and February 2019, MNP surveyed local governments, including RMA members, to understand their perspectives and insights on innovation: what prompts it, barriers to innovation, and how they are deploying new solutions to best serve their communities. The results provide a candid view of challenges, demands, and opportunities local governments are facing.
