Provide Your Opinion on Alberta Reclamation and Restoration Economy Survey

Canadian Forest Service, Natural Resources Canada is seeking input from municipalities

Canadian Forest Service, Natural Resources Canada is conducting a survey that aims to document the scope, scale, and focus areas of the reclamation and restoration (R&R) economy in Alberta. This survey will also provide insights into the organizations (public and private) that bring added values in the broader Canadian R&R strategy.

A report summarizing the results of the survey and a background literature review will be available in 2020. In order to prepare for the survey, please have available:

- the number of staff involved in R&R activities;
- the number of full-time equivalents that equate to the staff numbers; and,
- the approximate value for R&R revenue and expenses for the last fiscal year.

The survey closes on **December 20, 2019**. Click [here](#) to access the survey.

If you have any questions or concerns, or want to receive the survey in an alternate format (Word or pdf), please email Chris Powter at envirogas@shaw.ca.
