2019 Final Livestock Tax Deferral Provision Information Posted

Information on tax deferrals for areas facing drought and flood conditions that negatively affect livestock producers now available

Agriculture and Agri-Food Canada has released a **map** showing the areas eligible for the 2019 **Livestock Tax Deferral Provision**. This list is now finalized for 2019. The Livestock Tax Deferral Provision allows farmers who sell part of their breeding herd due to drought or flooding in prescribed drought or flood regions to defer a portion of sale proceeds to the following year. When prescribed regions are identified, the list is announced publicly and posted to this web page.

The assessment process is multi-phased, and the map is only the initial assessment. Additional regions may be included based on information from final forage yields. For more information on how the assessment is completed, or the criteria used to evaluate drought or flood conditions, please contact aafc.taxdeferral-repordelimpot.aac@canada.ca.
