

MITACS

INNOVATION MADE EASY

The data, analyses, tools, and guidelines you need to strengthen your community require talent, time, and budget. But finding the ideal combination of these three elements can be a challenge.

Mitacs helps you bridge those gaps.

We connect municipalities of all sizes with post-secondary researchers for innovative projects — from the impact of the pandemic to sustainability, smart cities, cybersecurity, public health, infrastructure and more — ensuring you develop the best public policies to create vibrant and healthy communities.

Proposals for new projects are accepted at any time but must be submitted by **November 2, 2020**.

SUPPORTING YOUR JOURNEY

- > We understand the challenges Canadian municipalities face
- > We find the right academic/research talent to provide you with the specialized knowledge and skills you need to advance policy and execute projects
- > We can provide financial support for your innovation needs, up to 55%

CASE STUDY

Municipalities across the globe are concerned about the impact of rising sea levels on their communities. Adaption is the key to surviving, but why does that have to be the end all? With the support of Mitacs, the University of British Columbia and Vancouver's space2place landscape architects are going a step further by exploring how adapting to rising sea levels can address additional local issues, such as recreation, habitat creation, energy development and food security.

YOU ARE THE PRIORITY

No matter the size of your community, we work with you:

- Municipal stakeholders, elected and administrative
- Major metropolitan regions
- Rural and suburban areas

No matter the scope of the project, we can help:

- Scalable, multidisciplinary projects
- Minimum project is 4 months with no maximum
- From \$15,000 to multi-million \$ in funding

BRINGING YOU EXPERIENCE

35,000+ collaborations to solve industry and societal challenges and drive innovation.

21 years in operation

117 post-secondary partners

33,000+ researchers in our network

\$700M+ invested in the past 10 years

6,800+ industry partners

CASE STUDY

In Windsor, Ont., the Downtown Windsor Business Improvement Association is dedicated to advocating for local businesses, but needed help understanding the issues businesses face in making informed recommendations. With the help of Mitacs, the Association is working with the University of Windsor to address one of their biggest policy questions: how does the centralization of social services and those who use them impact the environment of Downtown Windsor? The Association will use the data to further advocate for businesses and stakeholders.

Remember, proposals are accepted at any time but must be submitted by November 2.

For more information on how you and Mitacs can work together, contact Cédric Prince at cprince@mitacs.ca

We would like to thank the following governments for their support.
