## RMA Trade Announces the New Geospatial Program

RMA Trade is pleased to announce the new **Geospatial Program** as part of its offerings to members. RMA Trade works hard to specialize in certain product areas and has created customized programs for the membership in response to popular demand.

Everything you do must be done with accuracy, and the Geospatial Program provides a vast catalogue of measurement and survey equipment to help you accomplish your goals. The program provides transparent and consistent pricing, less administrative hassle, and full compliance with both the Canadian Free Trade Agreement (CFTA) and the New West Partnership Trade Agreement (NWPTA).

The Geospatial Program offers two approved suppliers for members to use: **Choice Survey & Construction Supplies Ltd.** and **Spatial Technologies.**

Choice Survey & Construction Supplies Ltd. is proudly Alberta owned and operated since 2011. Choice takes pride in providing excellent customer service for clients, specializing in sourcing better alternatives for the field, and offering a large selection of products.

Spatial Technologies' team of technical representatives include experienced technicians, professional land surveyors, and professional engineers. Spatial provides a complete range of surveying equipment, supplies, and tools ranging from basic construction lasers, advanced GNSS and Robotic survey instruments, UAVs, and 3D laser scanners.

In order to take advantage of the benefits of the Geospatial Program, organizations must be **registered members** in good standing with RMA Business Services.

Learn more about the **RMA Geospatial Program** and see our other **Trade programs** available to members.
