## RMA Trade Announces the New Aggregates Program

RMA Trade is pleased to announce the new **Aggregates Program** as part of its offerings to members.

When you need the best for your next construction or road projects, or snow and ice management, you need to find an affordable source for your aggregate needs. The program will help you source and transport surface materials; gives you access to resource mapping, modelling, and stockpile monitoring; and provides options for regulatory and resource engineering services. The program will also provide transparent and consistent pricing, less administrative hassle, and full compliance with both the Canadian Free Trade Agreement (CFTA) and the New West Partnership Trade Agreement (NWPTA).

RMA Trade is excited to partner with approved supplier **AMI RockChain Inc.** for this new program. AMI RockChain works with hundreds of aggregate suppliers across Canada, including local producers, all providing the materials you need for your projects. They help source, buy, transport, and ensure quality of aggregates through a digital platform that includes a network of suppliers, transportation, quality assurance laboratories, and equipment companies.

In order to take advantage of the benefits of the Aggregates Program, organizations must be **registered members** in good standing with RMA Business Services. Learn more about the **Aggregates Program** and our other **Trade programs** available to members. RMA Trade works hard to specialize in certain product areas and has created customized programs for the membership in response to popular demand.
