Source Water Protection Planning Webinar

Alberta Water Council will demonstrate risk assessment tool

Alberta Water Council (AWC) is hosting a webinar to demonstrate the Healthy River Ecosystem Assessment System (THREATS). THREATS is a secure, web-based data visualization and analysis platform. It incorporates both spatial and time series data sets as well as predictive and scenario models. It is designed to be modular and customizable with the intent to make data access, analysis, and visualization quick and convenient.

The webinar session will provide an overview of modules and data sets within the platform that aid in the development of source water protection and watershed management plans.

[Register](#) for the free webinar being hosted on September 27, 2022 from 9:00 to 10:30 am.
