## Register for Asset Management Small Group Learning Communities

*Applications are now open for all interested municipalities*

As part of the [suite of training](#) being offered by the RMA, ABmunis, and IAMA through the FCM's [Municipal Asset Management Program](#), registration for asset management small group learning communities is now open.

These communities will focus on developing partnerships between municipalities to share information and seek solutions on common asset management solutions. Communities can participate in one of the three themes:

- ◆ **Asset Management Has No Dumb Questions:** An opportunity for beginners to learn from one another, both as students and teachers of asset management concepts.
- ◆ **Teamwork Makes the Dream Work:** In these workshops, you will develop knowledge and skills for collaboration within administration, with council and the community through group exercises and story telling.
- ◆ **The Software Debate:** What software do you need to succeed in asset management? - A forum for communities to share their knowledge, experiences, and learnings with choosing and implementing software.

Community workshops will be held in February, June, and October 2023. [Register now](#) to join an inclusive community and learn more about asset management challenges.
