RMA Speed Testing Summary Report Available

Report summarizes the results of two years of testing

The RMA has concluded the internet speed testing project, which ran for two years to collect internet speed data in RMA member municipalities. Over this period, more than 35,000 tests were run in rural municipalities, and this would not have been possible without the support of our members - thank you!

To inform members and other stakeholders on the results of the speed testing project, the RMA has prepared a [summary report](#). This report provides the results of the RMA's internet speed testing project and outlines the RMA's next steps in advocating for rural internet. The RMA will be working with the data collected to provide evidence-based advocacy in the coming years.

Thank you again to those who promoted and engaged with the internet speed testing project.
