First RMA Wildfire Working Group Summary

RMA's wildfire working group held their initial meeting

In response to resolution [7-23F: Strategy for Management of Wildland Fires Outside the Forest Protection Area](#), the RMA has created a wildfire working group (WWG). The WWG will meet six times this year, with the goal of delivering a final strategy for managing wildfires outside of the forest protection area by the end of October.

The WWG met for the first time on May 24, and to facilitate transparency and keep members up to date on their work, the WWG will be sharing meeting summaries. The [first summary is now available](#) online.
